# The universal AI user interface

Qai represents a revolution, as it is used in natural language as a user interface to all digital business processes and applications in your company.

Qai AI: Realize the full potential of large language models such as GPT and Gemini more fully than ever before.

# Five sets, same result

# Onboarding, specialist and language coach in one

Say goodbye to language barriers! Qai makes it easy for employees to join your company - through dialog-based learning with simultaneous translation and correction.

Qai

## eLearning Qai

Your response contains some spelling and grammar errors. Here is the corrected version:

Corrected response: The UN number describes danger.

Explanation of corrections:

“un nummr” should be “UN-Nummer”.

“beschreibent” should be “beschreibt”.

“gefahr” should be “Gefahr”.

Correct answer:

The UN number is a four-digit number that identifies a hazardous material or a group of hazardous materials.

# Better with every sentence

An AI-supported digital buddy that learns and optimizes with every use by employees.

## Qai Troubleshooting Assistance

👤 12 | Helmut, Wilfried, Jana, Tom...

Hey Qai, the punching machine is having problems. It has stopped and shows error code E102. What should I do?

**Qai**

That is an error with the pneumatic system. Try restarting the machine. If that doesn't work, you need to check the pressure sensor.

👍 3 👎 6

**Helmut**

That's not quite right, I know this error. Turn off the machine and wait a few minutes. Then turn it back on and immediately press the „Reset“ button on the control panel.

👍 5

## Qai Troubleshooting Assistance

👤 12 | Helmut, Wilfried, Jana, Tom...

**Helmut**

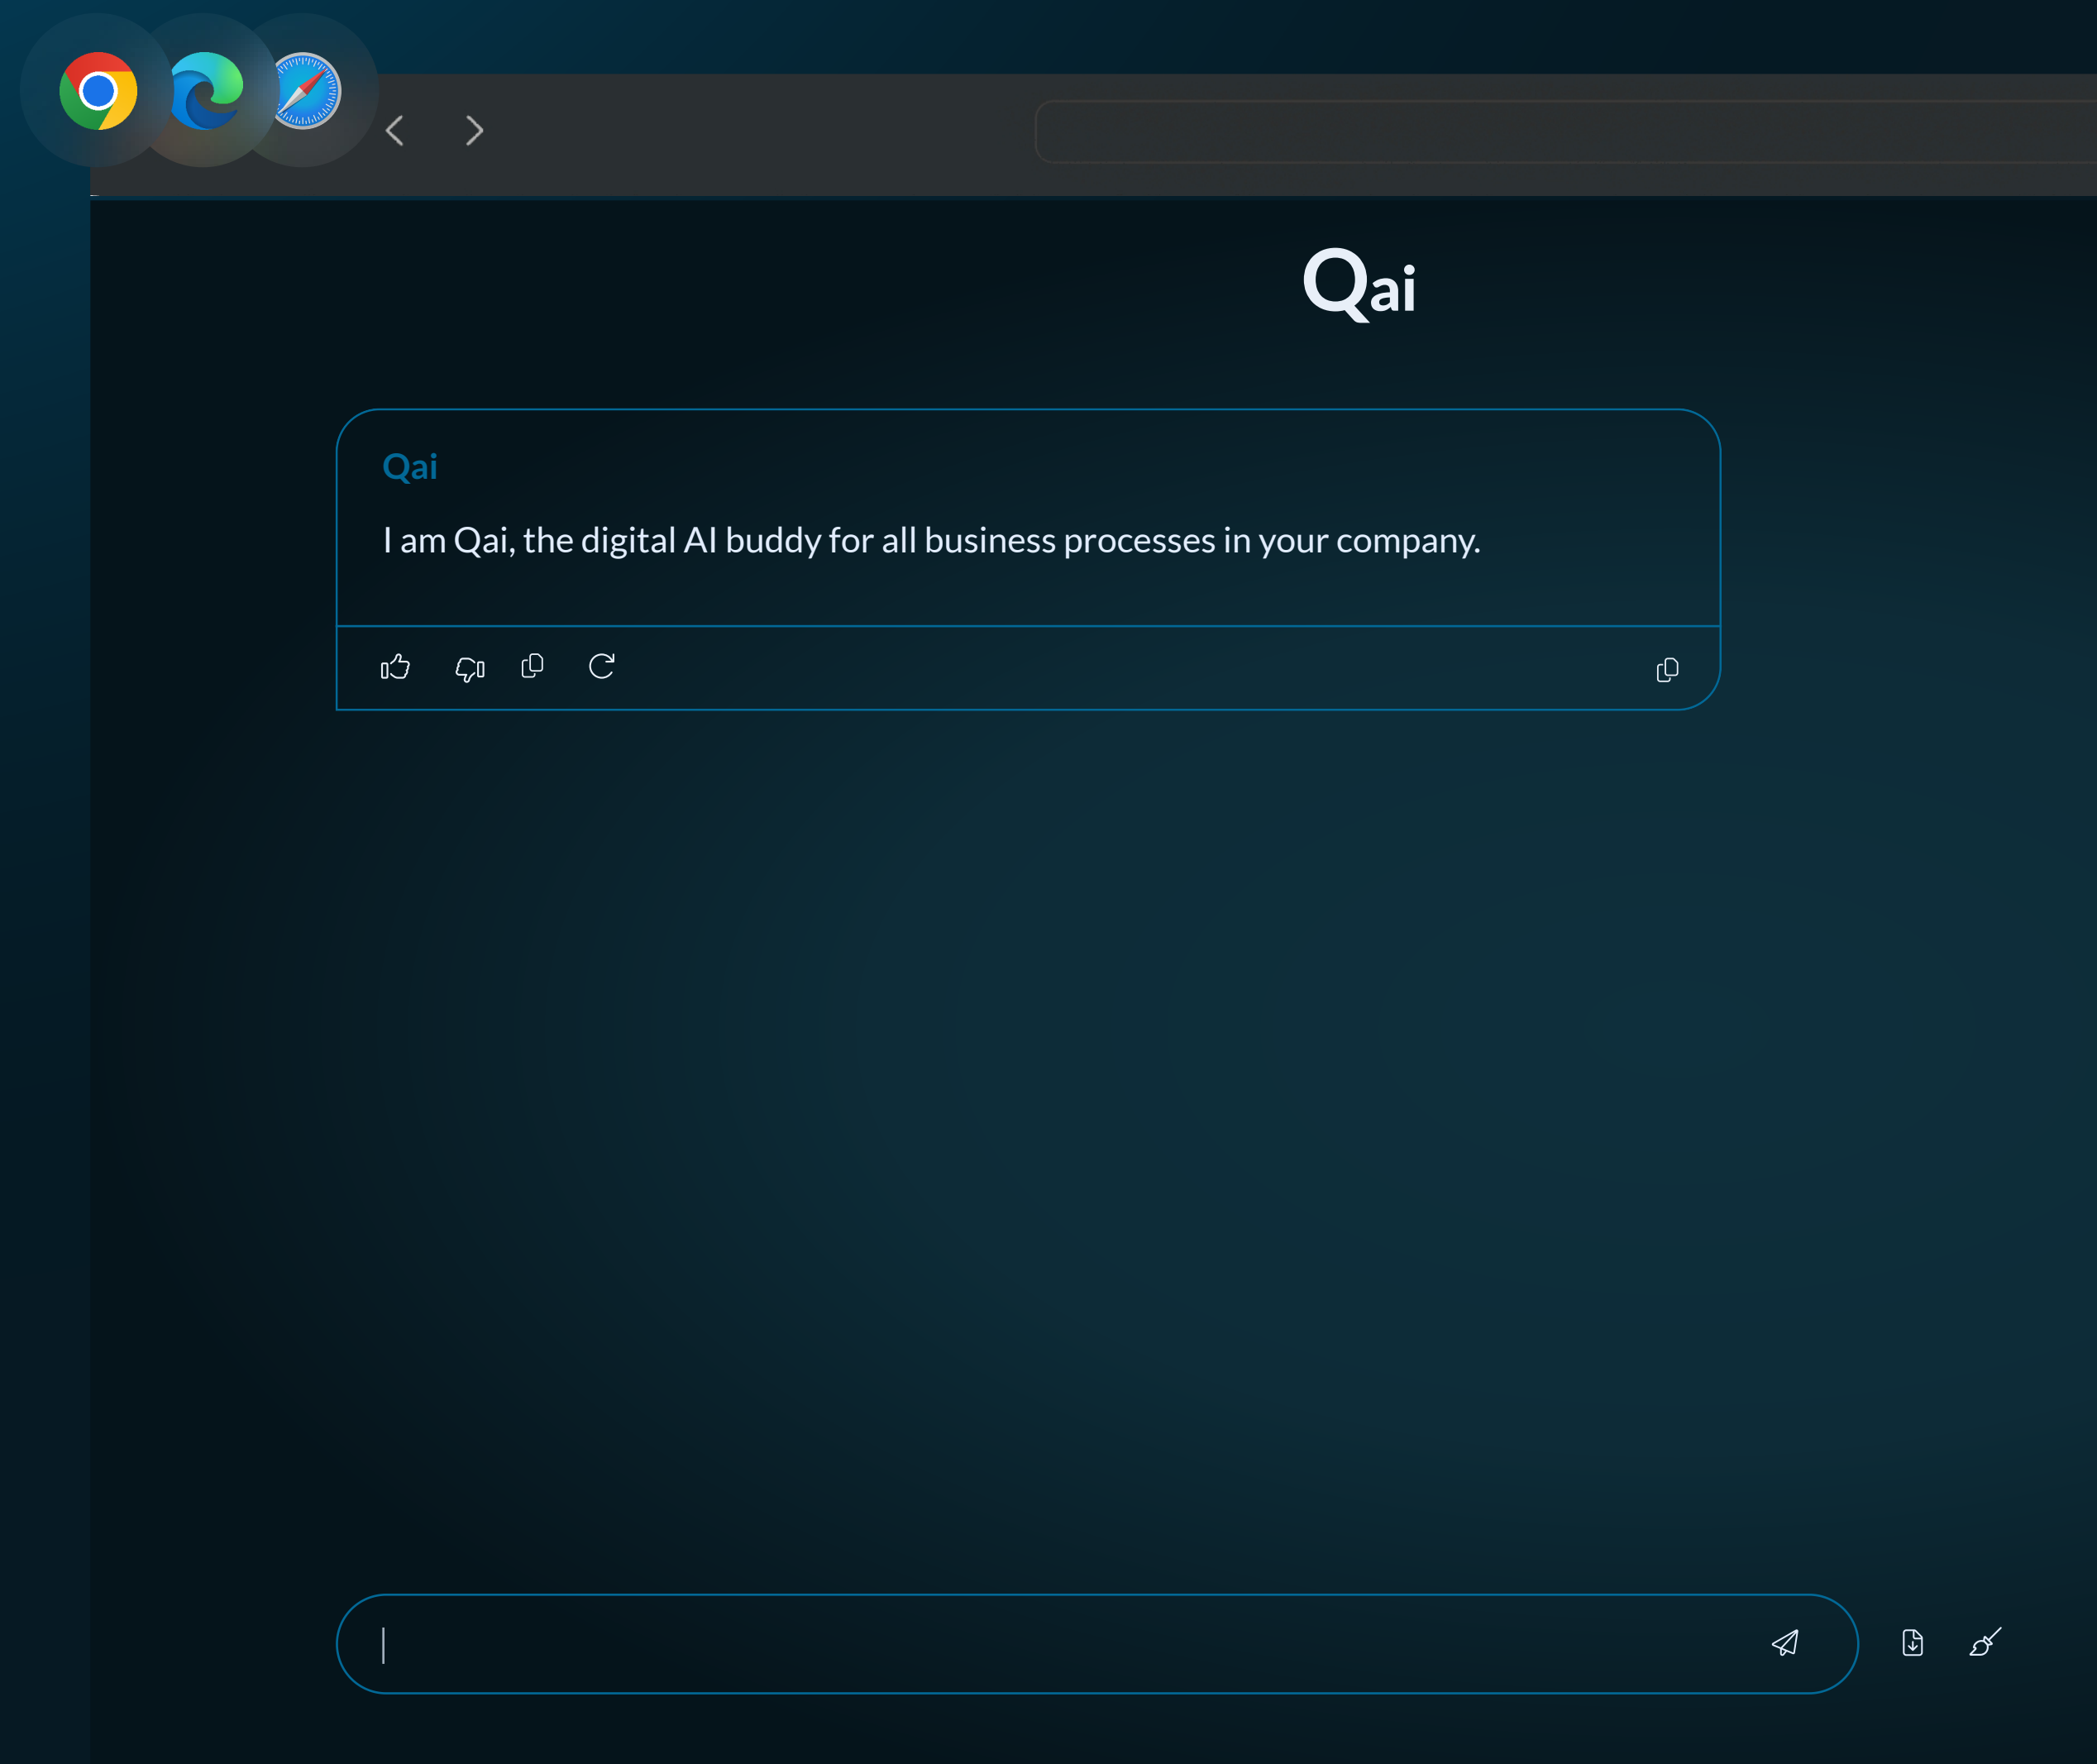

To explain: Error code E102 means that the pressure sensor is reporting an incorrect value. When you restart the machine and press the reset button at the same time, the sensor is reset, and the machine can operate normally again.

👍 3

Great, @Helmut, that worked, thank you. @Qai-Bot, please add Helmut's solution for error handling and his technical explanation for the punching machine M-432 to our help wiki and troubleshooting system.

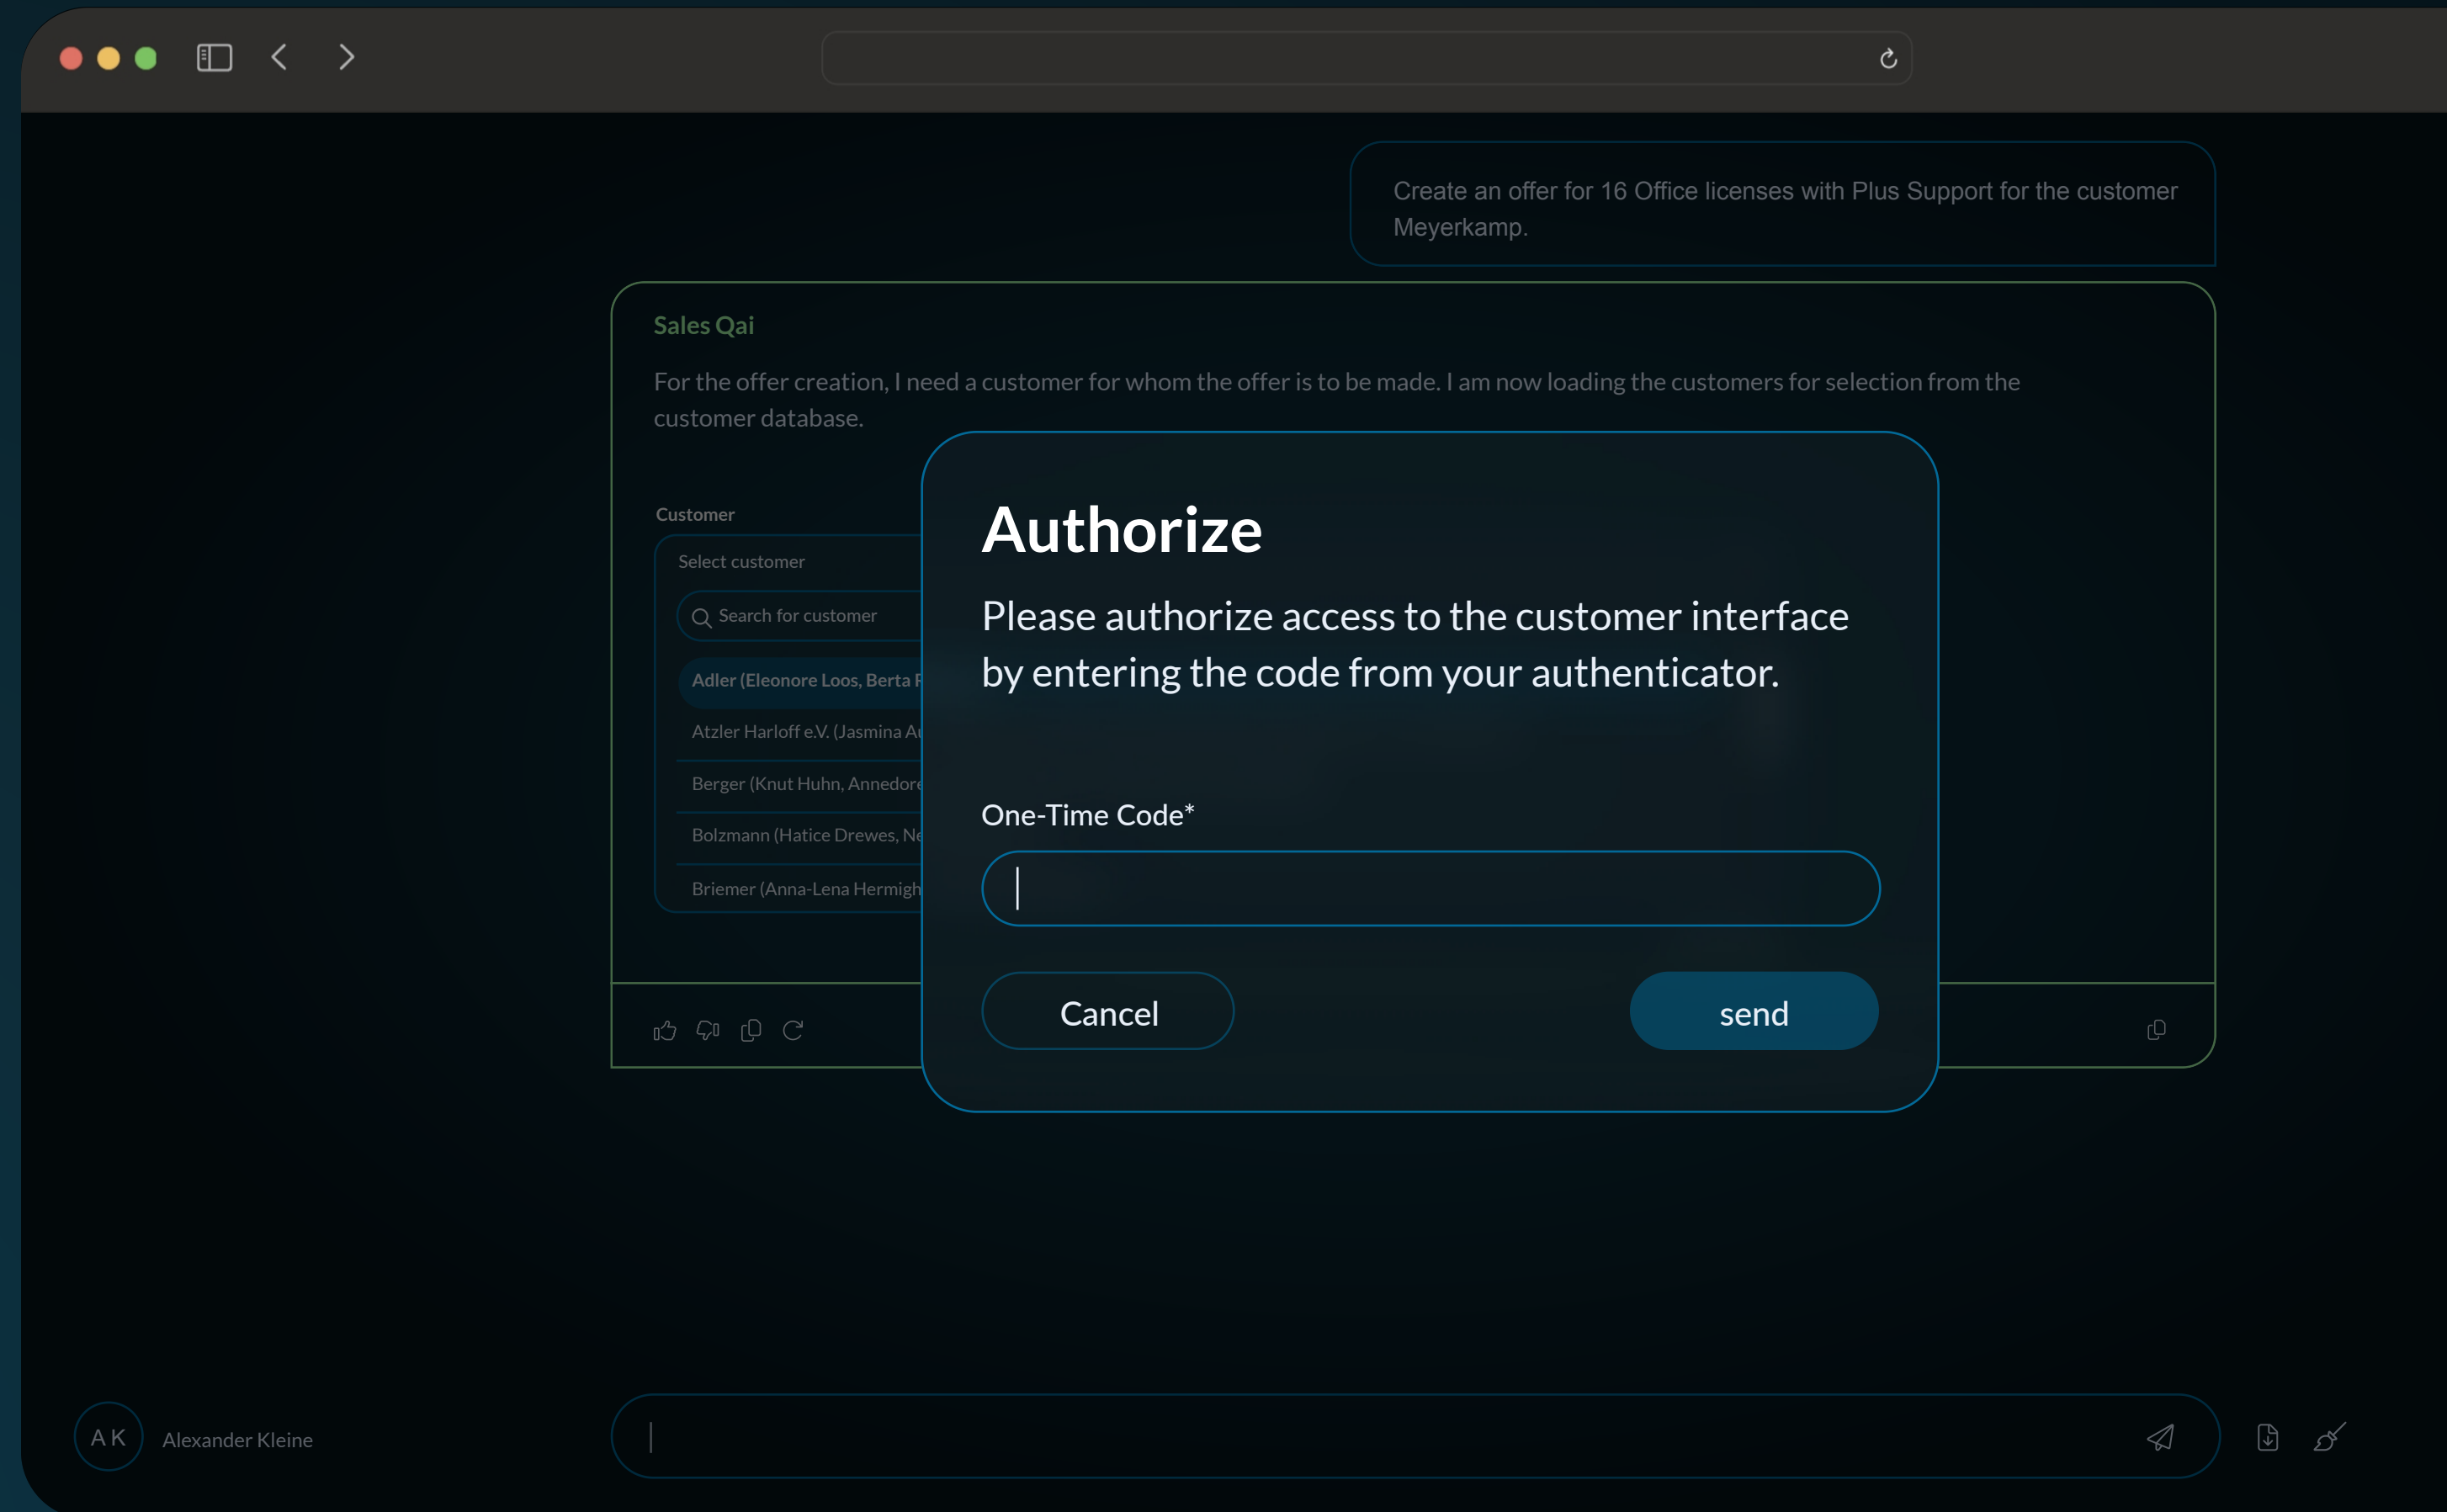

# Web. Mobil. Messenger.

A smart start with Qai: Integrating AI into your company has never been as easy and effective as with Qai.

# Communicate with security

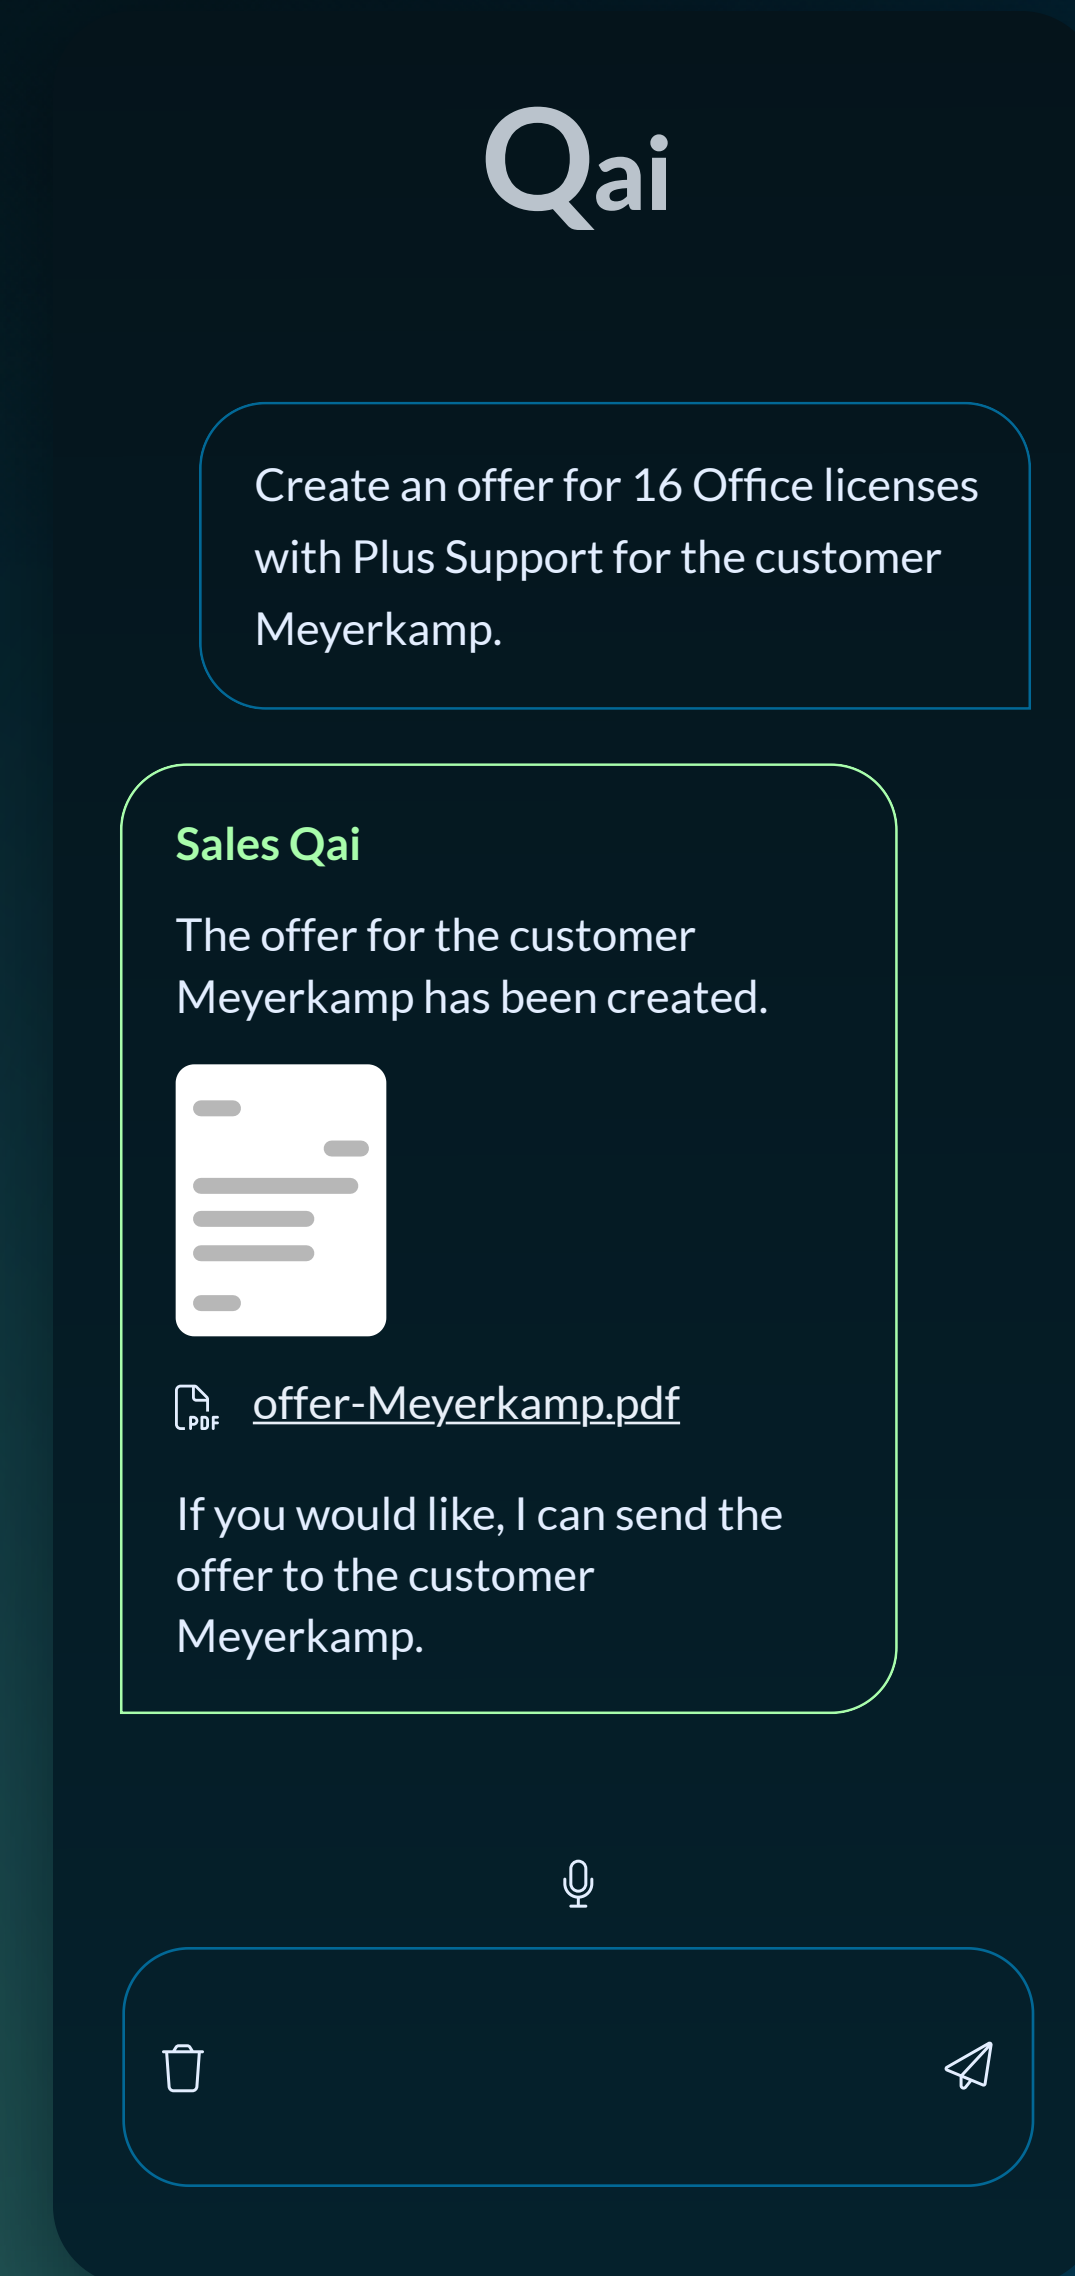

Qai integrates seamlessly into your existing security architecture and meets all requirements for identity management, authentication, session management and encryption.

# Qai instead of numerous expert applications

Complete complex business tasks with a single set of tools that would otherwise have required access to various specialist applications, interfaces and expert knowledge.

Qai: Efficiency and professionalization up, complexity and entry barriers down.

From administrative tasks in the office to assistance with operational activities - Qai provides support everywhere.

Let Qai take over repetitive tasks and save valuable time.

Work faster and more reliably with Qai.

Experience the future of your business processes with an advanced AI-based user interface. Complex processes? No longer a problem!
